

## Standard Plan Attestation Letter

A Compact Mobile Food Operation (CMFO) food cart, that was constructed from an approved Model Plan, can be approved without the need to submit plans for review. Los Angeles County Department of Public Health is providing this template to identify the information that is needed for an attestation letter to be accepted. The use of this template is not required but the information on the template is required to be on any attestation letter in order to approve a CMFO built to a standard plan.
