

# ATTENTION.

## Food Truck Operators

**Are you aware that your compressed gas cylinders must be inspected?**

Cylinders are required to be requalified, or replaced every 5-12 years depending on the cylinder type, condition, and previous qualification method (Ref. 49 CFR §§ 180.205(d) and 180.209).

The original manufacture/test date and any requalification/retest dates must be presented in a specific manner. Cylinders that are overdue for requalification must not be refilled.

If propane tanks are manufactured to ASTM Standards and built into the truck's body making it difficult to remove, then these tanks are exempt from the DOT reinspection requirements.

For more information, contact the Hazmat Info-Center: 1-800-467-4922.
