Below the header, a message reads: 'Welcome to StreetFoodFinder. Let's go through a few questions and steps to get your account setup.' A sub-section titled 'Step 1: Authenticate Your Truck' contains instructions: 'For security you must verify that you are in fact affiliated with the food truck. Please verify one or both accounts to continue. You may be prompted to verify both if your accounts are too new. Verifying both will help expedite the setup process. Contact support if you're having issues.' It features two input fields: 'Verify Facebook Page' and 'Verify Twitter Account', each with a small placeholder box above it. A green 'Next Step' button is located at the bottom right of the form area.

7) Choose the account you want to verify and follow the prompts to login, select the correct page, and allow permissions to SFF.

8) Continue the process to gain access to your SFF account.

No Social Media?

We ask trucks to verify ownership by authenticating through their social media.

If you don't have a Facebook or Twitter account, your truck can be manually added to SFF.

So that we can verify your truck, please send over the following info to support@streetfoodfinder.com:

1. Truck Name, Region of your truck, and please mention the City of Atlanta Public Vending Food Truck Program!
2. Photo of your truck / mobile set up
3. Photo of your health permit (paper copy)
4. Any other permits we can use to validate your ownership

Once we get this information, we'll get your truck added to the system! Look out for an email to set up your password and gain access to SFF!
